

Special Issue on “Fluvial Geomorphology - Drainage Networks and their Evolution” dedicated to the 10th International Congress of the Hellenic Geographical Society

This Special Issue of “International Journal of Geology” on “Fluvial geomorphology - Drainage networks and their evolution” is dedicated to the 10th International Congress of the Hellenic Geographical Society. The papers presented at the special session on “Fluvial Geomorphology” as well as at the sessions of “Geomorphology” and “Physical Geography” are very welcome. Additionally, papers dealing with the following topics are also welcome:

- Geomorphology of fluvial systems
- Fluvial landforms
- Quantitative analysis – geomorphometry – of drainage networks and basins
- Influence of tectonics on the evolution of fluvial landscape
- Sediment transport in rivers
- Alluvial fans’ formation and evolution processes
- Fluvial floods and flash flood events
- Anthropogenic interventions in drainage networks

The dead- line for paper submission is April 30, 2014. Manuscripts prepared according IJG guidelines should be sent directly to the Guest Editors of the Special Issue by the following address:

karymbalis@hua.gr and gaki@geol.uoa.gr

Professors Efthimios Karymbalis (Harokopio University of Athens) and

Kalliopi Gaki-Papanastassiou (National and Kapodistrian University of Athens)

Guest Editors
