system, multi-robot cooperation, motion control of mobile robot, intelligent solar drying technology, and so on. He is invited as a reviewer by the editors of some journals, such as *Journal of Theoretical and Applied Information Technology*, *Journal of Communications*, *Journal of Zhaoqing University*, *International Journal of Information and Computer Security*, etc. He has published more than fifty papers in related journals or international conferences. In addition, he is a co-chair of International Conference on Control, Automation, Robotics and Vision in recent years.

Jianbin Wang was born on Apr. 11, 1982. He received the Ph.D degree in control theory and control engineering from Guangdong University of Technology, China. Currently, he is a researcher at Zhaoqing University, China. His major research interests include control theory and intelligent robot control. He has published many papers in related journals.

Jianping Chen was born on Nov. 7, 1975. He received the Ph.D. degree in control theory and control engineering from Guangdong University of Technology, China. Currently, he works as a professor in Zhaoqing University, China. His major research interests include artificial intelligence and intelligent
