I would like to thank the NAUN because I received substantial and important peer review with several and substantial comments, that helps us in improving the manuscript

A short review of some mathematical methods to detect fake news by

Giuseppe Giordano, Serena Mottola, and myself.

Even if the paper contains a review on the subject, the reviewers' report helped us in the revision of the paper, and in adding new material. The aim in the refereeing process, in my opinion, is also the improvement of the quality of the paper, and this has been done in our case.
