

K. Tvrdá graduated at the Faculty of Civil Engineering Slovak Technical University in Bratislava, study program - Building Construction and Architecture, specialization - Statics of building structures. Since 2014 she has work at Slovak Technical University in Bratislava, Faculty of Civil Engineering, Department of Structural Mechanics as associate professor.

Her scientific field is optimization and reliability of building structures and optimization of structural elements and structures on a flexible and inelastic base, numerical methods in mechanics and creation of mathematical models.

Her teaching: Static Analysis of the Structures, Elasticity, FEM in statics and others.
